HANLIN ZHAO

Artificial Intelligence: Systems and Technologies · The Chinese University of Hong Kong
zhl2104405665@gmail.com | github.com/yumumumule

PROFILE

Second-year AIST student at CUHK with a strong academic record and early research experience in AI, robotic, and perception lab. Alongside research, actively involved in college representation, peer mentoring, and competitive debate, with a focus on thoughtful problem-solving, communication, and contribution to the university community.

EDUCATION

The Chinese University of Hong Kong (CUHK) Hong Kong

BEng in Artificial Intelligence: Systems and Technologies | Year 2
CGPA 3.883 / 4.000 · Dean's List 2025/26

RESEARCH EXPERIENCE

AI, Robotics, Perception Laboratory, CUHK 2026.8-now

Undergraduate Researcher | Supervisor: Prof. Ren Hongliang

Contributing to research in AI-enabled robotic perception and intelligent medical robotics, with current work spanning three projects:

- EndoNav — endoscopic navigation research and experimental support.
- EndoRinse — robotic irrigation and rinsing for endoscopic procedures.
- AgentVLA — self-evolving vision-language-action research.

LEADERSHIP & SERVICE

Shaw College Student Ambassador 2026.9

Represent Shaw College in student-facing activities, outreach, and community engagement, supporting communication between the College and its student community.

ICP Mentor 2026.9-now

Provide peer support and transition guidance to fellow students, helping mentees navigate university life and connect with the wider campus community.

Chinese Debate Team 2025.9-now

Member

Participated in competitive debate, evidence research, case construction, and team training; strengthened analytical reasoning, public communication, and collaborative problem-solving.
